

OBJECTIVES

1. To design and implement a centralized event management database.
2. To maintain information related to events, attendees, organizers, venues, and sponsors.
3. To automate event registration and attendance management.
4. To generate certificates for participants automatically.
5. To provide revenue and participation analytics.
6. To ensure data consistency through relational database constraints.
7. To implement triggers and stored procedures for process automation.
8. To provide management reports using SQL views and analytical queries.
9. To reduce manual effort and improve operational efficiency.
10. To demonstrate practical implementation of DBMS concepts using MySQL.
